

# AI Automation Playbook for Garage Door Companies

Systems by AI - AI Automation Playbook for Garage Door Companies

Common revenue leak: Emergency repair leads decay fast.

First automation 1: Instant lead response - reply fast, collect useful details, and alert the owner only when action is needed.

First automation 2: Follow-up engine - keep quotes, consults, estimates, and inquiries warm until they book, reply, or opt out.

First automation 3: Proof and content loop - turn finished work, reviews, FAQs, and customer questions into content that brings the next lead.

Workflow ideas: missed-call text-back, repair triage, estimate follow-up.
